PC TIPS BY LISA G., [A2Z Computer Help](#)

Tip for April:

Wireless Mouse and Keyboard:

Ever need another mouse and/or keyboard? You can easily turn your tablet or smartphone into either one to control your computer or laptop. Note, the computer will have to have a wireless adapter to do so. Since it is pretty common for laptops/notebooks to have an internal wireless adapter, this app will be of great assistance, should your wireless mouse go dead.

You install the app on your smart phone by going to your app store on your iphone or android phone and type remote mouse and install. Then on your computer you go to www.remotemouse.net and download the program on your computer. Now, you will be able to control a mouse from your smartphone for your computer.

Thank you,

Lisa Gambino
