I hope everyone is staying cool and enjoying their summer. It's definitely been a hot, hazy and humid summer so far.

Our July meeting saw the installation of new officers for the 2013-2014 year. I want to thank all members for their support and well wishes. I'm excited to be working with Mary, Lisa and Jane and I am confident that we will have a very successful year.

Much was covered at our last meeting; especially what needs to be done to increase our membership and raise money for our scholarship fund. I'm encouraged by our new members and their suggestions. I'm also thankful that many members have stepped up to the plate and offered to chair committees and look into ways we can move BPWSOC forward.

Being your president is a huge responsibility; one that I do not take lightly. Since joining BPWSOC, I have been continually impressed by the extent of dedication each members exhibits.

Our members are a group of highly intelligent, dedicated women who want nothing more than to see the future generation of women not have to

What is the Cloud?

Storage space on the internet. Cloud resources are shared by multiple users. This means that everyone can be subscribing to the same cloud service, but you all have your own sign in and password.

If you need further security beyond the password, you must use encryption (this will be the tip for next month).

Cloud Storage Service:

This is where you share and keep files off of your gadgets, i.e., smartphone, tablet or computer. There is a possibility that the service can go down and your files may be gone. This is not an automatic service, you have to tell them what files to upload or you can just access the file in the cloud and work on it there.

Recommended Cloud Storage services are Dropbox, Skydrive, Box, iCloud, Google Drive and many more.

Cloud Backup:

This creates copies of your files and if one copy is lost or damaged, your files are still safe. Cloud Backup is automatic and it detects changes and backs up the newest version immediately.

The most popular and highly recommended Cloud Backup service is Carbonite.

Than you,

Lisa Gambino from [A2Z](http://www.A2ZComputerHelp.com)
